

University Classes

One of the unique opportunities offered at MSMS is the dual-credit University-level classes provided. By taking advantage of these courses, students experience college-level work in a smaller classroom setting. This provides an opportunity for one-on-one help for each student by his or her teachers, something not available in a traditional college setting.

These courses allow students to begin earning college credit while still in high school, giving students a chance to better prepare themselves for college.

University Classes Offered:

1. University Calculus I
2. University Calculus II
3. University Statistics I
4. University Advanced Mechanics
5. University English I
6. University English II
